Professional Summary

Innovative and detail-oriented Full Stack Software Engineer Full Stack Engineer with 3+ years of experience building scalable enterprise web applications, AI-powered workflows, and high-performance dashboards using React, Node.js, FastAPI, and TypeScript. Specialized in LLM integrations, microservices architecture, frontend optimization, and large-scale data visualization systems. Proven track record in improving UI performance, optimizing SQL workloads, developing AI copilots/chatbots, and maintaining high engineering standards through automated testing and CI/CD pipelines.

Work Experience

Incedo Technologies Ltd., Hyderabad, India

Full Stack Web Developer (MySQL, React, Node.js, Vitest)

Oct 2025 – June 2026

- Refactored large monolithic React components into reusable custom hooks and modular architecture, significantly improving maintainability and rendering efficiency.
- Developed interactive analytical dashboards using ECharts and MUI with dynamic Bar, Pie, and Line visualizations.
- Optimized Live Network Maps rendering thousands of geolocation markers using Leaflet, debouncing, and isolated state management.
- Built Human-in-the-Loop (HITL) RCA systems using VectorDB-based feedback pipelines to continuously improve AI recommendations.
- Designed contextual follow-up prompt systems that dynamically generated intelligent suggestion flows from user interactions.
- Built scalable Node.js and FastAPI microservices serving dashboard KPIs and AI endpoints.
- Optimized complex SQL workloads across millions of records, reducing dashboard latency and preventing query timeouts.
- Resolved critical SingleStore memory issues by transitioning high-volume tables from RowStore to ColumnStore.
- Implemented snapshot tables and cron-based aggregation pipelines for near-instant dashboard analytics.

Wipro Technologies Ltd., Hyderabad, India

Front End Web Developer – JavaScript (React, Node.js)

Mar 2023 – July 2025

- Revamped critical UI components including modals, tabs, and navigation systems using React.js and Redux.
- Improved application responsiveness and load performance through lazy loading, React Suspense, and code splitting.
- Integrated REST APIs and asynchronous workflows with robust error handling and fallback UI strategies.

- Enhanced frontend reliability and reduced rendering bottlenecks across enterprise applications.

Projects

ShopKart — shop-kart.vercel.app

- Developed a responsive e-commerce application using React.js and Redux Toolkit.
- Implemented centralized state management for cart, product filtering, and checkout workflows.

Tech Stack: React.js, Redux Toolkit, JavaScript

Multiplayer Chess Game (WebSockets) - chess-multiplayer.vercel.app

- Built a real-time multiplayer chess platform using WebSockets and peer-to-peer communication.
- Implemented synchronized game state management with custom hooks and backend socket architecture.

Tech Stack: React.js, TypeScript, Node.js, Tailwind CSS, chess.js

Education

CMR Institute of Technology, Hyderabad

B.Tech

2018 – 2022

CGPA: 8.40

Sri Chaitanya Junior College, Hyderabad

Intermediate

2016 – 2019

Score: 90.10%

Sri Chaitanya High School, Hyderabad

SSC

2015 – 2016

GPA: 9.8

Skills

Frontend: React.js, Redux Toolkit, TypeScript, JavaScript, Material UI (MUI), Tailwind CSS, ECharts, Ag-Grid, Leaflet

Backend: Node.js, Express.js, Python, FastAPI, REST APIs, Microservices Architecture.

Testing & DevOps: Vitest, Jest, React Testing Library, Mocha, Docker, GitLab CI/CD, Kubernetes, ArgoCD

Databases: MySQL, MongoDB, SingleStore, SQL Optimization, ColumnStore/RowStore.

AI / GenAI: LLM Integrations, RAG Pipelines, Vector Databases, AI Chatbots, Prompt Engineering, MCP, Claude Code

Certifications

Wipro JavaScript L1

Wipro ReactJS L2

AWS Certified Cloud Practitioner
